TEST – I

Sem: Odd Sem 2019-20

Date: 01.09.2019

Course Code: CSE 208

Time: 11AM to 12PM

Course Name: THEORY OF COMPUTATION

Max Marks: 40

Program & Sem: B.Tech, (CSE) & III

Weightage: 20%

Instructions:

(i) Answer all the questions from each part

Part A [Memory Recall Questions]

Answer all the Questions. Each Question carries two marks. (5Qx2M=10M)

1. Define the Language of an automata with an example. (C.O.NO.1)[Knowledge]
2. Define the following with an example for each. (C.O.NO.1)[Knowledge]
 - a. Strings
 - b. Alphabet
3. Describe the deterministic finite automata with five component values. (C.O.NO.1)[Knowledge]
4. List the applications of finite automata. (C.O.NO.1)[Knowledge]
5. Describe the transition diagram with an example. (C.O.NO.1)[Knowledge]

Part B [Thought Provoking Questions]

Answer both the Questions. Each Question carries five marks. (2Qx5M=10M)

6. Shreyas is working on an abstract machine design. He wants to design a deterministic machine in such a way that only the strings with even occurrence of 1's and odd occurrence of 0's must be accepted by the acceptor. Construct the DFA for the above scenario and provide the transition diagram, transition table, five component values. Using extended transition function show the acceptance of the string "10010"

(C.O.NO.2.)[Comprehension]

7. Anu is having a collection of symbols with a's and b's. A deterministic automata has to be designed to accept the strings having "aa" but not "aaa". The occurrence of the symbol 'b' can be anywhere in the path of the string. The solution to the above problem must be provided with transition diagram, transition table, five component values and also show one valid string acceptance using extended transition function.

(C.O.NO.2.)[Comprehension]

Part C [Problem Solving Questions]

Answer both the Questions. Each Question carries ten marks. (2Qx10M=20M)

8. Convert the following Non Deterministic finite automata into deterministic finite automata. (C.O.NO.2)[Application]

	0	1
→ p	{p, q}	{p}
q	{r}	{r}
r	{s}	∅
*s	{s}	{s}

9. Convert the following ε-NFA to its equivalent DFA. (C.O.NO.2)[Application]

SCHOOL OF ENGINEERING

Semester: 3rd

SOLUTION

Semester: 3rd

Course Code: CSE 208

Course Name: Theory of Computation

Date: 01/10/2019

Time: 11AM to 12PM

Max Marks: 40

Weightage: 20%

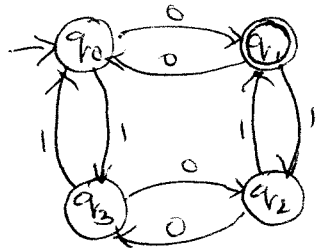

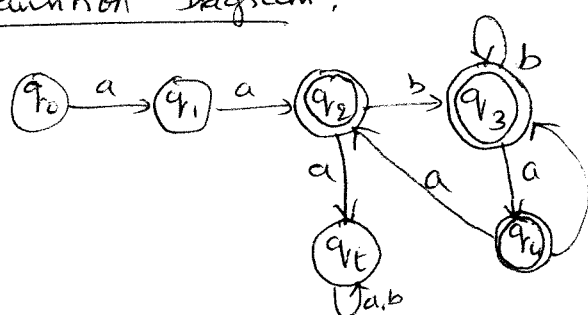

Part A

(5 x 2 = 10 Marks)

Q No	Solution	Scheme of Marking	Max. Time required for each Question
1.	The set of all strings from some Σ^* is called the language of an automata. Eq: $L = \{awa : w \in (a,b)^*\}$	2 M	2 min
2.a.	An alphabet is a finite set of symbols. It is denoted as Σ . Eq: $\Sigma = \{a,b\}$, $\Sigma = \{0,1\}$	2 M (+1)	2 min
b.	Finite sequence of symbols taken from some Σ is called the string. If $\Sigma = \{0,1\}$. The string = $\{0,1,001,010,\dots\}$		
3.	DFAM = $\{Q, \Sigma, \delta, q_0, F\}$ Define each tuple	2 M	2 min
4.	List atleast 4 applications of finite automata	2 M	2 min
5.	With an example description about Transition diagram	2 M	2 min

Part B

(2x 5 = 10 Marks)

Q No	Solution	Scheme of Marking	Max. Time required for each Question															
6.	<p>The alphabet recognized based on the given scenario is $\Sigma = \{0, 1\}$.</p> <p>Transition Diagram = </p> <p>Transition Table</p> <table border="1" data-bbox="590 672 893 963"> <thead> <tr> <th>States</th> <th>0</th> <th>1</th> </tr> </thead> <tbody> <tr> <td>q₀</td> <td>q₁</td> <td>q₃</td> </tr> <tr> <td>q₁</td> <td>q₀</td> <td>q₂</td> </tr> <tr> <td>q₂</td> <td>q₃</td> <td>q₀</td> </tr> <tr> <td>q₃</td> <td>q₂</td> <td>q₀</td> </tr> </tbody> </table> <p>Five Components $\{Q, \Sigma, \delta, q_0, F\}$ values 1M</p> <p>'10010' string derivation using δ^* 1M</p>	States	0	1	q ₀	q ₁	q ₃	q ₁	q ₀	q ₂	q ₂	q ₃	q ₀	q ₃	q ₂	q ₀	<p>2M</p> <p>5M</p> <p>1M</p> <p>1M</p>	<p>10 min</p>

SCHOOL OF ENGINEERING

TEST -2

Sem & AY: Odd Sem 2019-20

Course Code: CSE 208

Course Name: THEORY OF COMPUTATION

Program & Sem: B.Tech. (CSE) & III Sem

Date: 19.11.2019

Time: 11:00 AM to 12:00 PM

Max Marks: 40

Weightage: 20%

Instructions:

- (i) Read Questions carefully before answer the questions.
- (ii) Question Paper Contains three Parts.

Part A [Memory Recall Questions]

Answer all the Questions. Each Question carries two marks. (5Qx2M=10M)

1. Define CFG. (C.O.NO.3)[Knowledge]
2. Define Regular Expressions. (C.O.NO.3)[Knowledge]
3. Define PDA. (C.O.NO.4)[Knowledge]
4. Obtain Regular Expression for $L = \{0^n 1^m : n \geq 3, m \text{ is odd}\}$. (C.O.NO.3)[Knowledge]
5. Obtain CFG for $L = \{w w^R : w \in \{0, 1\}^*\}$. (C.O.NO.3)[Knowledge]

Part B [Thought Provoking Questions]

Answer both the Questions. Each question carries ten marks. (2Qx10M=20 M)

6. Peter want to construct a PDA to accept the Language $L = \{w \mid w \in \{a,b\}^* \text{ and } n_a(w) = n_b(w)\}$. (C.O.NO.4)[Comprehension]
7. Show that Language $L = \{a^n b^n, n \geq 0\}$ is not regular using pumping lemma. (C.O.NO.3)[Comprehension]

Part C [Problem Solving Questions]

Answer both the Questions. Each question carries five marks. (2Qx5M=10M)

8. Convert the regular expression $r = (a+b)^* abb$ into nfa with ϵ transitions. (Use thomson construction). (C.O.NO.3)[Application]
9. Consider the following CFG, $S \rightarrow aS \mid aSbS \mid \epsilon$, Show that deviation for the string aab is ambiguous. (C.O.NO.3)[Application]

SCHOOL OF ENGINEERING

Semester: III

Course Code: CSE 208

Course Name: THEORY OF COMPUTATION

Date: 19-11-2019

Time: 11:00 AM to 12:00 PM

Max Marks: 40

Weightage: 20%

Extract of question distribution [outcome wise & level wise]

Q.NO	C.O.NO	Unit/Module Number/Unit /Module Title	Memory recall type [Marks allotted] Bloom's Levels			Thought provoking type [Marks allotted] Bloom's Levels			Problem Solving type [Marks allotted]			Total Marks
			K			C			A			
1,2,4, 5, 7,8,9	3	3	8			10			10			28
3.6	4	4	2			10						12
	Total Marks		10			20			20			40

K = Knowledge Level C = Comprehension Level, A = Application Level

Note: While setting all types of questions the general guideline is that about 60%

Of the questions must be such that even a below average students must be able to attempt, About 20% of the questions must be such that only above average students must be able to attempt and finally 20% of the questions must be such that only the bright students must be able to attempt.
