TEST 1

Sem & AY: Odd Sem. 2019-20

Course Code: ECE 202

Course Name: SIGNALS AND SYSTEMS

Program & Sem: B.Tech (ECE&EEE) & III

Date: 30.09.2019

Time: 11:00 AM to 12:00 PM

Max Marks: 40

Weightage: 20%

Instructions:

- (i) Read the question properly and answer accordingly.
- (ii) Question paper consists of 3 parts.
- (iii) Scientific and Non-programmable calculators are permitted.

Part A [Memory Recall Questions]

Answer all the Questions. Each Question carries six marks. (2Qx6M=12M)

1. The system whose input and output defined with the mathematical equation $y[n] = 2x[-n/2] + x[n-2]$ check whether the system is Dynamic or Static, Causal or Non Causal and Time invariant or Time varying. (C.O.NO.1) [Comprehension]
2. Sketch the following signal $x(t) = \sin(2\pi t)u(t)$ and find the fundamental angular frequency of the signal $x(t)$. (C.O.NO.1) [Comprehension]

Part B [Thought Provoking Questions]

Answer all the questions. Each Question carries eight marks. (2Qx8M=16M)

3. A system which satisfies superposition principle and the shift in the response will be same as shift in the excitation is ready to process any arbitrary signal which can be expressed as weighted sum of delayed unit impulses whose magnitude exists at integer values of time. Identify the system, what will be the response of the system based on the input and its characteristics as defined. (C.O.NO.1) [Application]

4. Sketch the following signals $x(t)$ & $x(-2t+2)$ where $x(t) = e^{-at} [u(t+4) - u(t-4)]$ find even and odd components of $x(t)$. (C.O.NO.1) [Comprehension]

Part C [Problem Solving Questions]

Answer the question. The Question carries twelve marks. (1Qx12M=12M)

5. Sketch and check whether the signal $x(t)$ defined below is an energy signal power signal and neither energy nor power signal. Where $x(t) = r(t) = t u(t)$. (C.O.NO.1) [Comprehension]

	Total Marks											40

K = Knowledge Level C = Comprehension Level, A = Application Level

Note: While setting all types of questions the general guideline is that about 60%

Of the questions must be such that even a below average students must be able to attempt, About 20% of the questions must be such that only above average students must be able to attempt and finally 20% of the questions must be such that only the bright students must be able to attempt.

I here certify that All the questions are set as per the above lines Mr. Sunil kumar Dasari.]

Reviewer's Comments :

- ① Everything O.K. except solution for "Forest C" missing.
- ② In Q.P. after fullstop, space should come.
- ③ Question NO-03 should be considered as "Application Level"
 how? Q. Name the Transition

Annexure- II: Format of Answer Scheme

SOLUTION-TEST-I

Semester: ODD

Course Code: ECE202

Course Name: SIGNALS AND SYSTEMS

Date: 30-09-2019

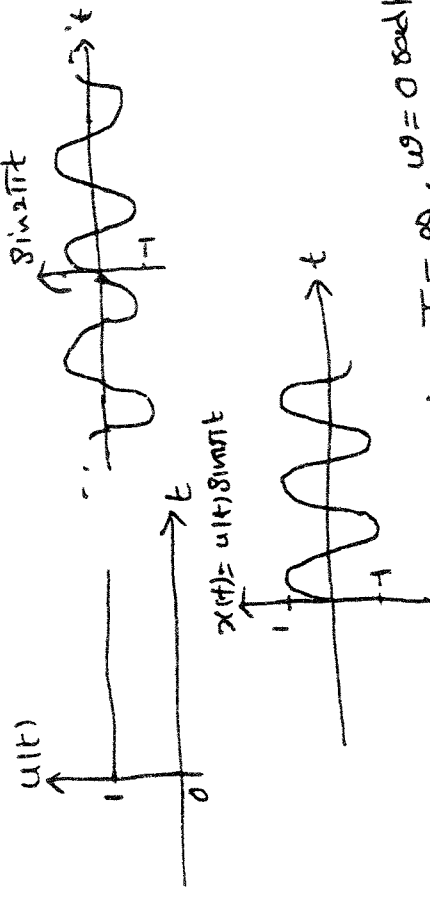

Time: 11:00AM -12:00PM

Max Marks: 40

Weightage: 20%

Part A (2Q x6 M =12 Marks)

Q	Solution	Scheme of Marking	Max. Time required for each Question
N			
o			

1.	$y(n) = 2x(-n/2) + x(n-2)$ <p> $\left. \begin{array}{l} \rightarrow \text{Dynamic} \\ \rightarrow \text{Non-causal} \\ \rightarrow \text{Time Varying} \end{array} \right\} \begin{array}{l} \text{ps.o/p} \\ \text{Depends on past \& future} \\ \text{input} \end{array}$ $\rightarrow \text{Time Varying} \rightarrow \text{fails to satisfy Time Invariant condition.}$ </p>	2+2+2	6
2	 <p> $x(t) = u(t)\sin \omega t$ $x(t) = \sin \omega t$ </p> <p>$x(t)$ is aperiodic signal, i.e. $T = \infty$, $\omega = 0 \text{ rad/sec}$</p>	Sketching 4 marks Aperiodic signal 1 mark Angular frequency ZERO saying that aperiodic signal may be treated as periodic signal with infinity Time period-1 mark	6

Part B

(2Q x 8 M = 16 Marks)

Q No	Solution	Scheme of Marking	Max. Time required for each Question
1	<p>is DT-LTI System.</p> <p>$h(n-k) = T\{\delta(n-k)\}$ because it is T.I.</p> <p>Any arbitrary DT. Signal $x[n]$ can be expressed as the weighted sum of delayed unit impulses.</p> <p>$y[n] = T\{x[n]\} \text{--- ①}$</p> <p>$x[n] = \sum_{k=-\infty}^{\infty} x[k] \delta(n-k) \text{--- ②}$</p> <p>Sub. ② in ①</p> <p>$y(n) = T\left\{\sum_{k=-\infty}^{\infty} x(k) \delta(n-k)\right\}$</p>	DT LTI-IM DERIVATION-7	15

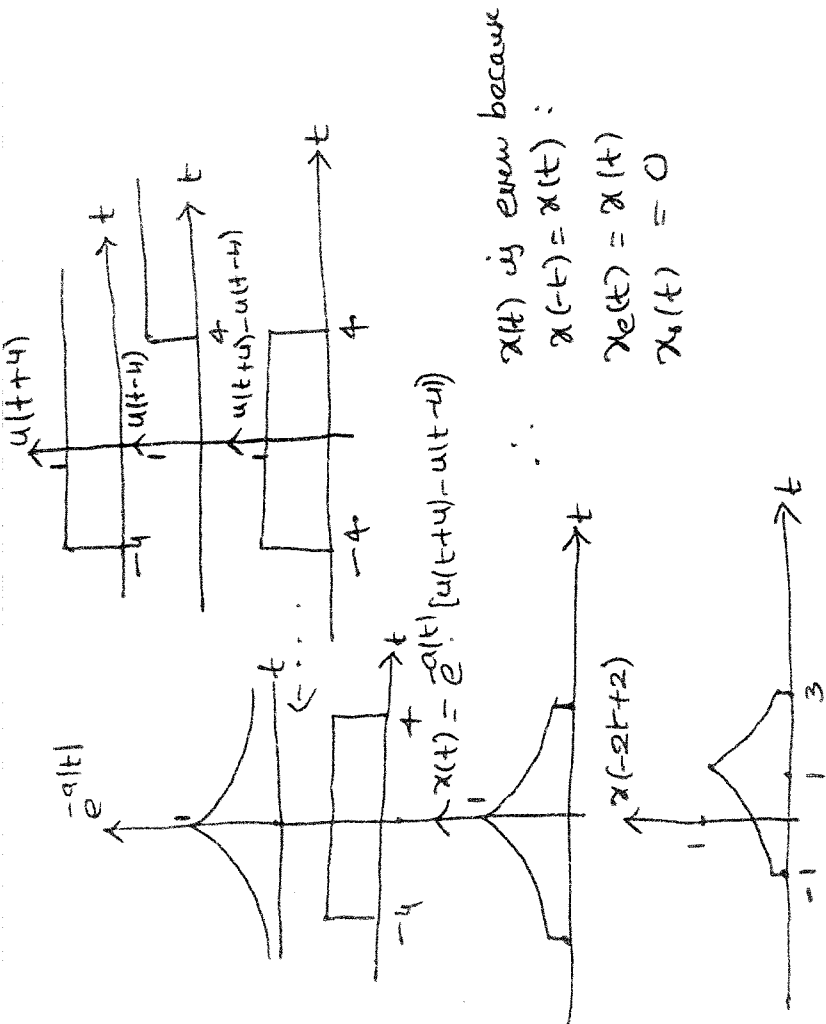

$$y[n] = \sum_{k=-\infty}^{\infty} x[k] T \{ \delta[n-k] \}$$

using eq-②

$$y[n] = \sum_{k=-\infty}^{\infty} x[k] h[n-k]$$

is called as
convolution sum.

$$\therefore y[n] = x[n] * h[n].$$

$x(t)$ is even because
 $x(-t) = x(t)$
 $x_e(t) = x(t)$
 $x_o(t) = 0$

SKETCHES

$e^{-a|t|}$ - 1 MARK

$[u(t+4) - u(t-4)]$ - 1 MARK

$x(t) = e^{-a|t|} [u(t+4) - u(t-4)]$ - 1 MARK

$x(-2t+2)$ - 3 Marks

TEST – 2

Sem & AY: Odd Sem 2019-20

Course Code: ECE 202

Course Name: SIGNALS AND SYSTEMS

Program & Sem: B.Tech (ECE&EEE) & III

Date: 18.11.2019

Time: 11:00 AM to 12:00 PM

Max Marks: 40

Weightage: 20%

Instructions:

- (i) Read the questions carefully and answer all the questions.
- (ii) Scientific calculator is permitted.

Part A [Memory Recall Questions]

Answer both the Questions. Each Question carries six marks. (2Qx6M=12M)

1. Fourier series representation is applied to which class of signals? Describe in brief.
(C.O.NO.2) [Knowledge]
2. Write $x(t)=3+4\sin(3\omega_0t)+5\cos(4\omega_0t)$ using Fourier Series and identify the coefficients and write their conjugates.

(C.O.NO.2) [Knowledge]

Part B [Thought Provoking Questions]

Answer both the Questions. Each Question carries eight marks. (2Qx8M=16M)

3. Consider two periodic signals $x(t)$ and $y(t)$ with Fourier series coefficient pair a_k and b_k respectively, having same fundamental angular frequency $\omega_0=2\pi/T$. Find the Fourier series coefficient of the convolved signal $(x(t)*y(t))$.

(C.O.NO.2) [Knowledge]

4. Find the Fourier series coefficients and determine Fourier series representation of the signal $x(t)$.

(C.O.NO.2) [Knowledge]

Part C [Problem Solving Questions]

Answer the Question. The Question carries twelve marks. (1Qx12M=12M)

4. What will be the the output of the LTI system for the given input $x(n)$ through graphical method, given the impulse response of the system $h(n)$.

$$\begin{array}{ccc}
 x(n) = \{ 1, 3, 5 \} & h(n) = \{ 2, 6, 4 \} \\
 \uparrow & \uparrow
 \end{array}$$

END TERM FINAL EXAMINATION

Semester: Odd Sem. 2019 - 20

Course Code: ECE 202

Course Name: SIGNALS AND SYSTEMS

Program & Sem: B.Tech(ECE/EEE) & III

Date: 24 December 2019

Time: 1:00 PM to 4:00 PM

Max Marks: 80

Weightage: 40%

Instructions:

- (i) Read the question properly and answer accordingly.
- (ii) Question paper consists of 3 parts.
- (iii) Scientific and Non-programmable calculators are permitted.

Part A [Memory Recall Questions]

Answer all the Questions. Each Question carries 4 marks. (6Qx4M=24M)

1. Represent the following signals (both Continuous and discrete) with functional and graphical Representations (C.O.No.1) [Knowledge]
 - i) Unit Step
 - ii) Ramp
2. With Suitable Mathematical Equations Explain Energy and power of Signal (both Continuous and discrete) (C.O.No.1) [Knowledge]
3. Explain the following (C.O.No.2) [Knowledge]
 - i) Static and Dynamic System
 - ii) Causal and Non-Causal System
4. Sketch the bellow given signal (C.O.No.4) [Knowledge]
 $X(t)=\sin(\omega t)*U(t-1)*U(9-t)$
5. Discuss the stability of the system by considering the system function $H(s)$ (C.O.No.3) [Knowledge]
6. State the following Fourier series properties (C.O.No.2) [Knowledge]
 - i) Time shifting property
 - ii) Parseval's Identity

Part B [Thought Provoking Questions]

Answer both the Questions. Each Question carries 12 marks. (2Qx12M=24M)

7. What will be the response of the system whose impulse response is $[1 \ 2 \ 2]$ and for the input $\begin{bmatrix} -2 & 1 & 2 & 3 & -1 & 2 \\ & & \uparrow & & & \end{bmatrix}$ use graphical representation method. (C.O.No.2) [Application]

8. Compare Fourier Transform, Discrete time Fourier Transform, Laplace Transform, Z-Transform and Identify, is there any common computational factor? (C.O.No.3,4) [Comprehension]

Part C [Problem Solving Questions]

Answer both the Questions. Each Question carries 16 marks. (2Qx16M=32M)

9. State and Prove the following Fourier Transform Properties (C.O.No.3) [Comprehension]

- i) Frequency shifting.
- ii) Time shifting.
- iii) Differentiation in time domain.
- iv) Convolution

10. a) find Z-Transform of following signals (C.O.No.3,4) [Comprehension]

- i) $X(n) = \cos(w^*n) U(n)$
- ii) $X(n) = a^n \sin(w^*n) U(n)$

- b) Find Discrete time Fourier Transform of following signals

- i) $X(n) = \left(\frac{1}{2}\right)^n U(n)$
- ii) $X(n) = n U(n)$
