**Course Code:** CIV 404

**Course Name:** Construction Project Management

**Program & Sem:** B.Tech (CIV) VII & OE

**Date:** 30.09.2019

**Time:** 1.00PM to 2.00PM

**Max Marks:** 40

**Weightage:** 20%

---

**Instructions:**

- (i) *All the questions are compulsory*
  - (ii) *Scientific calculators are allowed*
- 

**Part A [Memory Recall Questions]**

**Answer all the Questions. Each Question carries four marks. (3Qx4M=12M)**

1. Define project. What are the unique features of a construction project?

(C.O.NO.1)[Knowledge]

2. What are the principles based on which organization structure is built?

(C.O.NO.1)[Knowledge]

3. Explain what are the factors considered to identify competent project manager which are critical to manage projects.

(C.O.NO.1)[Knowledge]

**Part B [Thought Provoking Questions]**

**Answer all the Questions. Each Question carries six marks. (3Qx6M=18M)**

4. Matrix organization is an organizational structure that assigns specialists from different functional departments to work on one or more projects. List what are the advantages and disadvantages of this organization structure.

(C.O.NO.1)[Comprehension]

5. Functional managers are usually specialists, analytically oriented and they know the details of each operation for which they are responsible. How are project managers different from functional managers and explain what are their responsibilities towards the parent company?

(C.O.NO.1)[Comprehension]

6. Explain the roles and responsibilities of all the stakeholders in a construction project.

(C.O.NO.1)[Comprehension]

**Part C [Problem Solving Questions]**

**Answer the Question. The Question carries ten marks.**

**(1Qx10M=10M)**

7. Briefly explain about phases of a construction project.

(C.O.NO:1)[Knowledge]

## SCHOOL OF ENGINEERING

Semester: VII

Course Code: CIV 404

Course Name: Construction Project Management

Date: 30-09-2019

Time: 1 Hour

Max Marks: 40

Weightage: 20%

### Extract of question distribution [outcome wise & level wise]

Q.NO	C.O.NO	Unit/Module Number/Unit /Module Title	Memory recall type	Thought provoking type	Problem Solving type	Total Marks
			[Marks allotted] Bloom's Levels	[Marks allotted] Bloom's Levels		
			K	C	A	
1	CO 1	1	4			4
2	CO 1	1	4			4
3	CO 1	1	4			4
4	CO 1	1		6		6
5	CO 1	1		6		6
6	CO 1	1		6		6
7	CO 1	1	10			10
	Total Marks		22	18	00	40

K = Knowledge Level C = Comprehension Level, A = Application Level

Note: While setting all types of questions the general guideline is that about 60%

Of the questions must be such that even a below average students must be able to attempt, About 20% of the questions must be such that only above average students must be able to attempt and finally 20% of the questions must be such that only the bright students must be able to attempt.

[I hereby certify that All the questions are set as per the above guide lines. Ms. Navaneetha H ]

**Sem & AY:** Odd Sem 2019-20

**Course Code:** CIV 404

**Course Name:** CONSTRUCTION PROJECT MANAGEMENT

**Program & Sem:** B Tech & VII (OE)

**Date:** 18.11.2019

**Time:** 1.00 PM to 2.00 PM

**Max Marks:** 40

**Weightage:** 20%

**Instructions:**

- (i) Read the question properly and answer accordingly.
- (ii) Question paper consists of 3 parts.

**Part A [Memory Recall Questions]**

**Answer all Questions. Each question carries five marks.**

**(4Qx5M=20M)**

1. Describe general conditions of contract and bill of quantities. [5](CO1) [Knowledge]
2. What is lumpsum contract? What are its advantages [5](CO1) [Knowledge]
3. Describe work breakdown structure with an example? [5](CO2) [Application]
4. List the rules for drawing network diagram [5](CO2) [Application]

**Part B [Thought Provoking Questions]**

**Answer the Question. The question carry ten marks.**

**(1Qx10M=10M)**

5. A company is involved in the production of M – sand for a particular construction site. The entire project is divided into eight activities. Answer the following questions with the help of the table given below.

Activity	Immediate	Duration of
A	-	2
B	-	3
C	B	1
D	A,C	4
E	C	3
F	C	2
G	D,E,F	5

- I. Draw the network diagram for all the activities and their immediate predecessors. [4]
- II. Draw the Gantt chart for the above network and find the total duration for the completion of the project. [6]

(CO2) [Application]

### Part C [Problem Solving Questions]

**Answer the Question. The question carry ten marks. (1Qx10M=10M)**

6. Draw the network diagram for the following activities and identify the critical activities, non-critical activities and the critical path. Also find the project duration.

(CO2) [Application]

Activity	Immediate	Duration of
A	-	2
B	A	1
C	A	3
D	B,C	2
E	C	4
F	D,E	2
G	F	3
H	F	1
I	G,H	2

**PRESIDENCY UNIVERSITY  
BENGALURU**

**SCHOOL OF ENGINEERING**

**END TERM FINAL EXAMINATION**

**Semester:** Odd Semester: 2019 - 20

**Date:** 26 December 2019

**Course Code:** CIV 404

**Time:** 9:30 AM to 12:30 PM

**Course Name:** CONSTRUCTION PROJECT MANAGEMENT

**Max Marks:** 80

**Program & Sem:** B.Tech (All programs) & VII (OE-II)

**Weightage:** 40%

**Instructions:**

- (i) Read the all questions carefully and answer accordingly.
- (ii) Scientific non-programmable calculators are permitted

**Part A [Memory Recall Questions]**

**Answer all the Questions. Each Question carries 5 marks.**

**(4Qx5M=20M)**

1. What are the common mechanisms for resolving construction dispute?  
(C.O.No.3) [Knowledge]
2. List all the rules used in construction of project network.  
(C.O.No.2) [Knowledge]
3. Briefly explain about advantages and disadvantages of line-staff organization structure in a construction company.  
(C.O.No.1) [Knowledge]
4. Develop project network for the following activity relationships:

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
Predecessor	-	A	A	C	C	C	D,E,F	G	H	H	I,J	K	L	L	B,M,N

(C.O.No.2) [Comprehension]

**Part B [Thought Provoking Questions]**

**Answer all the Questions. Each Question carries 10 marks.**

**(4Qx10M=40M)**

5. Budgeted cost of a construction project is estimated at Rs.900000/-. The project is planned to be completed in 9 months. The project is tracked after a month, 10% of the project is completed at a total expense of Rs.100000/-. The planned completion of work should have been 15%. Interpret the performance of project by earn value analysis.

(C.O.No.2) [Comprehension]

6. A Gantt chart is one of the most popular and useful ways of showing activities (tasks or events) displayed against time. Using Gantt chart determine the duration of the project for the following with help of project network:

<b>Activity</b>	A	B	C	D	E	F	G	H
<b>Predecessor</b>	-	A	A	B,C	C	D	E,F	F,G
<b>Duration</b>	2	3	3	2	1	2	3	4

(C.O.No.2) [Comprehension]

7. Total quality management has been trending management approach in construction industry used in enhancing performance in the project planning and delivery processes. TQM can be summarized as a management system for a customer-focused organization that involves all employees in continual improvement. What are the basic elements of *quality* which can be implemented in construction industry?

(C.O.No.3) [Knowledge]

8. CPM and PERT are techniques used for scheduling and controlling projects. Mention differences between these two techniques. Identify the critical path in the following network using critical path method:

<b>Activity</b>	A	B	C	D	E	F	G	H
<b>Predecessor</b>	-	A	A	B,C	D	D,E	E,F	G
<b>Duration</b>	2	3	4	5	1	2	4	5

(C.O.No.2) [Comprehension]

### Part C [Problem Solving Questions]

Answer the Question. The Question carries 20 marks

(1Qx20M=20M)

9. From the below table, find the minimum possible time of the project and cost associated with this project.

Activity	Predecessor	Normal time	Crash time	Normal Cost	Crash cost
A	-	2	1	10000	15000
B	A	8	5	15000	21000
C	A	4	3	20000	24000
D	B	1	1	7000	7000
E	B	2	1	8000	15000
F	C,D	5	3	10000	16000
G	E	6	2	12000	36000
H	F,G	4	3	10000	12000

(C.O.No.2) [Application]

<p>7.</p>	<p>The basic element of quality in construction is:</p> <ul style="list-style-type: none"> <li>▶ Quality characteristics</li> <li>▶ Quality of design</li> <li>▶ Quality of conformance</li> </ul> <p>Quality characteristics: Quality characteristics is related to the parameters with respect to which quality – control processes are judged. Quality characteristic includes strength, colors, texture, dimension, height etc. Example in compressive strength of concrete, usability of concrete in slump , etc.</p> <p>Quality of design:- It refers to the quality with which the design is carried out. It primarily related to meeting the requirement of the standard, functionally efficient system and economical maintainable system.</p> <p>Quality of conformance:- It is referred to the degree to which the constructed facility conformed the design and specification.</p>	<p>Just naming 3 elements: 1 marks Explanation: 3 marks each</p>	<p>15 minutes</p>
<p>8.</p>	<p><b>Difference between CPM and PERT:</b></p> <ol style="list-style-type: none"> <li>1. PERT is event oriented whereas CPM is activity oriented. In simple words, in PERT network interest is focused upon start or completion of events and not on activities themselves.</li> <li>2. In CPM network no allowance is made for uncertainties in the duration of time involved whereas in PERT network uncertainty is considered.</li> <li>3. In PERT, time is not related to cost whereas in CPM the object is to develop an optimum time cost relationship. However, PERT has since been extended in this direction and the line dividing PERT/CPM is gradually fading out.</li> <li>4. In CPM duration of activity is estimated with a fair degree of accuracy. In PERT duration of activities are not so accurate and definite</li> </ol>	<p>Difference- ( any 3 points) – 3 marks</p>	

Critical path : A - C - D - E - F - G - H.

Project duration : 23 days

Non critical activities : (B).

Part C

(1Q x 20M = 20Marks)

Q No	Solution	Scheme of Marking	Max. Time required for each Question
5	<p>Critical path : A - B - E - G - H.</p> <p>Non-critical activities : C, D, F</p> <p>Cost slope : <math>\frac{C_c - N_c}{N_f - C_t}</math></p>	<p>Network: 3 marks            Identification: 3 marks            Cost slope: 2 marks            Each trial: 3 marks each</p>	<p>30 mins</p>

Activity	Normal time	Crash time	Normal Cost	Crash cost	Cost slope
x A	2	1	10,000 15,000	15,000	5000 x
x B	8	5	15,000 21,000	21,000	2000 x
C	4	3	20,000	24,000	4000 x
x D	1	1	7,000	7,000	0000 x
E	2	1	8,000	15,000	7000
F	5	3	10,000	16,000	3000
G	6	2	12,000 24,000	36,000	6000
x H	4	3	10,000 12,000	12,000	2000 x

Various paths : A-C-F-H = 2+4+5+4 = 17

. A-B-D-F-H = 2+8+1+5+4 = 20

. A-B-E-G-H = 2+8+2+6+4 = 22

• Activity A, B, E, G, H can be crashed depending on minimum cost slope.

• B, H have cost slope of 2000. Anyone activity can be crashed.

Trial 1: Crashing activity B by 3 days.

$$A-C-F-H = 17$$

$$A-B-D-F-H = 20$$

$$A-B-E-G-H = 22$$

Activity B cannot be crashed anymore.

Trial 2: Crashing activity H by 1 day

$$A-C-F-H = 17$$

$$A-B-D-F-H = 19$$

$$A-B-E-G-H = 21$$

Activity H cannot be crashed anymore.

Trial 3: A-B-E-G-H remains critical path, however.

B & H cannot be crashed anymore.

Out A, E, G least cost slope is 5000 for activity A

By crashing activity A by 1 day:

$$A-C-F-H = 16$$

$$A-B-D-F-H = 18$$

$$A-B-E-G-H = 20$$

Activity A can no longer be crashed

Prat 4 :-

Activity A-B-E-G-H is critical path

But, A, B, H cannot be crashed anymore  
Out E, G lowest cost slope is 6000 for  
activity G.

By crashing activity G by 2 days.

$$A-C-E-H = 15$$

$$A-B-D-F-H = 15$$

$$A-B-E-G-H = 15$$

Activity G can be further crashed however  
all three paths have become critical path.  
hence the min. crashed time = 15 days  
Cost = ₹1,19,000/-
