Part B

Answer the Questions.

Total Marks 40M

11.	a.	Career vs. Higher Studies – A Financial Decision You are a 22-year-old recent graduate and are faced with a major life decision. You have two options: Option A: Start Working Immediately You have received a job offer with a starting salary of ₹ 6,00,000 per annum, which will increase by 10% every year for the next 5 years. You plan to save 30% of your salary each year and invest it in a fixed deposit earning 8% annually (compounded annually). Option B: Pursue an MBA You decide to pursue an MBA that will cost ₹ 10,00,000 in total, paid upfront. During the 2-year course, you will have no income. After graduation, you expect a starting salary of ₹ 12,00,000 per annum, with a 12% annual increment for the next 3 years. You will save 30% of your salary and invest it in the same fixed deposit at 8% compounded annually. Assumptions for Both Options: 1. All savings are invested at the end of each year. 2. The investment earns 8% interest compounded annually. 3. You are comparing both options over a 5-year time horizon. 4. You are ignoring tax and inflation for simplicity. Recommend which Option is best based on time value of money.	10 Marks	L3	CO 1
Or					
12.	a.	Mr. John has taken a loan from Axis Bank Ltd., for 5 years at 10% interest rate per annum of ₹ 8,00,000. Determine the loan installment of Mr. John and prepare loan amortization schedule,	10 Marks	L3	CO 1

		if the loan are due.
