Qn.No	Questions	M	CO	BT
21	Evaluate Mental Status Examination in diagnostic reasoning.	15	CO5	BT5
22	A 30-year-old female is brought by family members with complaints of reduced speech, decreased activity, and social withdrawal for 4 months. She reports persistent sadness, loss of interest, fatigue, poor concentration, and disturbed sleep. She believes she is worthless and feels guilty about minor past events. Appetite is reduced, and she has stopped attending work. During the interview, she speaks slowly, maintains poor eye contact, and appears tearful. Insight is partial. Evaluate the case using: • Symptom identification • Psychopathological analysis	15	CO5	BT5

	• Mental Status Examination • Diagnosis • Clinical interpretation
