## PART C

### ANSWER ALL THE QUESTIONS

(2 X 10 = 20M)

#### 19. READ THE FOLLOWING PASSAGE AND ANSWER THE QUESTIONS

(CO3,CO4) [Application]

Fruits, vegetables, places, animals, and birds are all essential elements of our natural world that play a vital role in maintaining the balance of our ecosystem. Fruits are a rich source of essential vitamins, minerals, and antioxidants. Examples of fruits include apples, bananas, oranges, strawberries, and mangoes. Apples are a rich source of fiber and vitamin C, while bananas provide potassium and vitamin B6. Oranges and strawberries are packed with vitamin C, antioxidants, and other beneficial nutrients. Mangoes are a good source of vitamins A and C and are also rich in antioxidants. Vegetables are also an important component of a healthy diet. Examples of vegetables include cauliflower, green leaves, carrots, tomatoes, and potatoes. Green Leaves are high in iron and also contains vitamin K, vitamin A, and vitamin C. Carrots are an excellent source of beta-carotene, which is essential for eye health. Tomatoes are rich in lycopene, an antioxidant that helps protect against cancer and heart disease. Potatoes are a good source of potassium, vitamin C, and fiber. Animals are a crucial part of our ecosystem, playing a vital role in maintaining the balance of nature. Examples of animals include lions, elephants, tiger, cheetha and bears. Lions are apex predators and are vital for maintaining the balance of their ecosystem. Elephants are huge being with big trunk and legs. They are keystone species, playing an important role in seed dispersal and maintaining the structure of their habitat. Pandas are an endangered species that play a crucial role in their ecosystem by spreading seeds and helping to maintain the bamboo forests where they live. Birds are also an important part of our ecosystem. Examples of birds include eagles, owls, crane, peacock, parrot. Eagles are apex predators that play a crucial role in maintaining the balance of their ecosystem. Owls are nocturnal birds of prey that help control rodent populations. In conclusion, fruits, vegetables, places, animals, and birds are all essential elements of our natural world. They play a vital role in maintaining the balance of our ecosystem and provide us with essential resources such as food, clothing, and recreational opportunities. It is our responsibility to protect and preserve these precious resources for future generations to enjoy.
